Summary

Overall risk level:

Low

Risk ratings:

High:	0
Medium:	0
Low:	2
Info:	8

Scan information:

Start time:	2019-12-04 02:30:46 UTC+02
Finish time:	2019-12-04 02:30:53 UTC+02
Scan duration:	7 sec
Tests performed:	10/10
Scan status:	Finished

Findings

Server software and technology found

Software / Version	Category
UserVoice	Issue Trackers
Facebook	Widgets
Google Analytics	Analytics

Details

Risk description:
An attacker could use this information to mount specific attacks against the identified software type and version.

Recommendation:
We recommend you to eliminate the information which permit the identification of software platform, technology, server and operating system: HTTP server headers, HTML meta information, etc.

More information about this issue:
https://www.owasp.org/index.php/Fingerprint_Web_Server_(OTG-INFO-002).

Robots.txt file found

https://mtgstudio.com/robots.txt

Details

Risk description:
There is no particular security risk in having a robots.txt file. However, this file is often misused to try to hide some web pages from the users. This should not be done as a security measure because these URLs can easily be read from the robots.txt file.

Recommendation:
We recommend you to remove the entries from robots.txt which lead to sensitive locations in the website (ex. administration panels, configuration files, etc).

More information about this issue:
https://www.theregister.co.uk/2015/05/19/robotstxt/

No vulnerabilities found for server-side software

No security issue found regarding HTTP cookies

HTTP security headers are properly configured

Communication is secure

No security issue found regarding client access policies

Directory listing not found (quick scan)

No password input found (auto-complete test)

No password input found (clear-text submission test)

Scan coverage information

List of tests performed (10/10)

- Fingerprinting the server software and technology...
- Checking for vulnerabilities of server-side software...
- Analyzing the security of HTTP cookies...
- Analyzing HTTP security headers...
- Checking for secure communication...
- Checking robots.txt file...
- Checking client access policies...
- Checking for directory listing (quick scan)...
- Checking for password auto-complete (quick scan)...
- Checking for clear-text submission of passwords (quick scan)...
